

# Our Vacuum Sealers

 **SIPROMAC**

HELPS YOU SAVE EVERYTHING

# Our Mission

To create sustainable solutions so everyone can preserve food and eliminate food waste.

## Why?

The science is unequivocal: there is a cause-to-effect relationship between GHG emissions and climate change. We believe that every action makes a difference, especially when it comes to reducing food waste, which our equipment helps to do on a daily basis.

When we created Sipromac, we didn't want to go halfway. That's why our engineers developed a highly-durable product with as many uses as you can imagine.

While their classic function suggests preserving and extending the **shelf life** of food while enhancing flavors, our machines also help you **save time, money, space** and the **environment** by eliminating **food waste**, a real scourge that generates 8-10% of global GHG emissions.

**Sipromac helps you save everything.**

Sipromac offers a complete line of vacuum packaging equipment adapted to the most demanding needs of the industry.

Thanks to their versatility and reliability, our machines fit all types of customers. Regardless of the sector in which you operate, our products, team and expertise have one important thing in common: **they can be trusted!**

# Our Vacuum Sealers

**TABLETOP**

**SINGLE CHAMBER**

**DOUBLE CHAMBER**

# Tabletop Vacuum Sealers

**Ideal for small spaces, small production volumes and start-ups**

The tabletop vacuum sealer is the perfect solution to seal small foods. Whether you are a start-up or an established business, this model is well-suited for small production volumes. Compact and easy to use, it can be placed on a table or counter, maximizing space in your kitchen.

## Basic Features

- Stainless steel construction, grade 304
- Twin seal element
- Transparent lid
- Lid lock
- Vacuum sensor in %
- Silencer for end-of-cycle aeration

## Reliable

Made of robust 304 grade high-quality stainless steel, our machines have a lifespan of over 25 years.

## High Performance

Equipped with Busch pumps, our machines are designed to operate for hours of continuous production, offering the best performance in the industry.

## Spacious

Our tabletop models have one of the largest chambers in their category with regard to height and width. You get more space for your products compared to other machines on the market.

## Tabletop Vacuum Sealers

# Available Options

### Electric cut off

Sealing system with round element; the top wire pre-cuts the excess part of the bag.

For improved visual presentation.

### Air regulator (compressor not included)

Regulates the air pressure under the seal bars to ensure a tight seal (for MAP use only).

### Soft air

This function allows to control the speed at which the air re-enters the machine after the bag has been sealed, thus preventing products from being crushed.

Stainless steel cart

Stainless steel tilted insert

Gas injection (MAP)

### Gas injection (MAP) (except for model 250)

The ambient air in the pouch is modified by adding a food-grade gas to extend the shelf life of your food and optimize its appearance.

### Stainless steel tilted insert

Prevents liquid products from spilling inside the machine. Ideal to pack pickled foods, soups and sauces.

Adjustable plate height.

### Stainless steel cart

Ideal when the vacuum sealer needs to be moved frequently and for an ergonomic working height.

### Other voltage options

# Single-chamber Sealers

## A First Step Toward Industrial Production

The single-chamber vacuum packaging machine is a medium-capacity machine designed for higher production outputs or for bulky products.

With its swivel casters, it can easily be moved from one place to another and offers an ergonomic height.

### Basic Features

- Stainless steel construction, grade 304
- Twin seal element
- Vacuum sensor in %
- Hinged panels
- Casters with locking mechanism
- Silencer for end-of-cycle aeration

### Reliable

Made of robust 304 grade high-quality stainless steel, our machines have a lifespan of over 25 years.

### High Performance

The chamber size of our single chamber sealers allows to seal large products or multiple bags at the same time. Equipped with Busch pumps, our machines are designed to operate for hours of continuous production, offering the best performance in the industry.

### Ergonomic

Our single chamber models have a functional height that allows to easy handle the products and the lid. Additionally, the seal bars are located on the side of the machine, making it easier to place the bags comparatively to front and rear bars.

Technical Specifications	450T	450A	550A	560A	580A
<b>Applications</b> (ideal for)	Bulky products and limited space (e.g. pizza, fish)	Butcher shops, slaughterhouses, fish markets, grocery stores and cannabis growers starting with vacuum packaging	Medium-volume butcher shops, slaughterhouses, fish markets, grocery stores, cheese producers and cannabis growers	Medium-volume butcher shops, slaughterhouses, fish markets, grocery stores, cheese producers and cannabis growers	Very large products

## Single-chamber Sealers

# Available Options

### Electric cut off

Sealing system with round element; the top wire pre-cuts the excess part of the bag.

For improved visual presentation.

### Air regulator (compressor not included)

Regulates the air pressure under the seal bars to ensure a tight seal (for MAP use only).

### Soft air

This function allows to control the speed at which the air re-enters the machine after the bag has been sealed, thus preventing products from being crushed.

### Electric heated control box

Essential for machines installed in areas below 10C degrees or 30F degrees. The box protects the electrical box from the cold and humidity, ensuring the durability of the machine.

### Gas injection (MAP)

The ambient air in the pouch is modified by adding a food-grade gas to extend the shelf life of your food and optimize its appearance.

### Stainless steel tilted insert

Prevents liquid products from spilling inside the machine. Ideal to pack pickled foods, soups and sauces.

Adjustable plate height.

### 12" Lid (550A, 560A and 580A)

For products with a greater height (8" and more), a 12" cover is available to ensure the seal is properly made.

### Pump upgrade

The bigger the pump, the faster it will be. Increase your production capacity by reducing the sealing time by up to 15 seconds.

### Other voltage options

# Double-chamber Sealers

## Unfailing Production Capacity

The double-chamber vacuum machine is the largest and most powerful one of the Sipromac line, and allows to pack large quantities of bulky products, greatly increasing production volume.

Additionally, the double chamber allows the operator to load and unload the chamber while sealing on the other side.

### Basic Features

- Stainless steel construction, grade 304
- Double seam band element
- Ergonomic spring system
- Casters with locking mechanism
- Vacuum sensor in %
- Hinged panels
- Silencer for end-of-cycle aeration

### Reliable

Made of robust 304 grade high-quality stainless steel, our machines have a lifespan of over 25 years.

### High Performance

The two chambers allow to double productivity and eliminate idle time. Equipped with Busch pumps, our machines are designed to operate for hours of continuous production, offering the best performance in the industry.

### Ergonomic

Our double chamber models have a functional height that makes it easy to place products. Moreover, thanks to the spring system in the lid\*, they can be easily moved with only one finger.

\*Our spring systems have a lifespan of over 10 years.

# Impressed Customers

“ We have been using Sipromac for over 20 years. It’s been so efficient in giving us great production capacity that it’s allowed us to double, even triple it! “

- Camille Salvas  
Fromagerie Polyethnique /  
Le Bédouin

“ We started vacuum sealing our cheeses because we had some quality issues. The sealer really saved us. As soon as we started vacuum sealing, our quality problems disappeared. “

- Carly Foley  
Fauxmagerie Zengarry

“ We used to cut a quarter stick of salami and turkey at a time. Now we can cut the whole thing in one go and the product lasts three times as long. It saves us a lot of time. It’s so fresh when you open it, it’s like you just sliced it. “

- Bob Vasaturo  
Westshore Pizza

“I just finalized a delivery for one of my customers. I always work with the best manufacturers. Two pieces of equipment were delivered on time, Sipromac being one of them.

I am satisfied with the double chamber vacuum sealers. With the connectors attached to the stainless-steel seal bars, I give them a score of 100%.

I’ve been in the business for over 30 years and I can assure you that Sipromac vacuum sealers are way ahead of the competition.”
